
A
1. Measure proteins
proteins
batch 1
batch 2
2. Remove the batch effect
batch 1
batch 2
3. Compare two runs
same person
r = 0.381
run from batch 2
run from batch 1
protein level (log2, relative to its typical level)
-3.5
0
+3.5
B
Which pairs of runs are compared
plate group 1
plate group 2
person 1
person 2
person 3
plate B
plate C
same person, different plates: should match
different people, different plates: should not match
same plate: not used
