
A
1. Quantify proteins
proteins
batch 1
batch 2
2. Subtract the per-batch median
batch 1
batch 2
3. Scale proteins, correlate
same donor
r = 0.381
run on batch 2
run on batch 1
log2 abundance relative to the protein median (scale clipped)
-3.5
0
+3.5
B
Which pairs the score is read on
plate group 1
plate group 2
donor 1
donor 2
plate B
plate C
donor 3
same donor, different plate: match
different donor, different plate, any group: non-match
same plate: excluded
